RE: Emma Park Limestone Project  
ML 49955-LS  
DOGM S/49/52

Dear Mr. Nielson:

I am not accepting and am returning herewith your revised-description application for a Limestone lease in the Emma Park area, Utah County. The Trust Lands Administration does not issue mineral leases on quarter-quarter-quarter sections of land. Your current mineral lease ML 49955-LS covers ONLY the E2SE4 of Section 32, T11S, R9E, SLB&M, 80 acres. No operations will be permitted in the SE4S4E4SE4 of said Section 32 under the current mineral lease. Please plan your mining operations accordingly.

NE  
PPB

In the event you require additional acreage for your proposed mining operations you must submit application to the Trust Lands Administration for a separate mineral lease containing not less than a 40-acre quarter-quarter section of land adjacent to your existing mineral lease in Section 32. Annual rentals and annual minimum royalties shall be required on any additional mineral lease.

There still seems to be a question or discrepancy regarding the location of your proposed 5-acre quarry with respect to the mineral lease boundary. I am herewith, again, requesting that you prepare and submit to the Trust Lands Administration a map prepared by a Certified Professional Engineer showing the exact location of the proposed 5-acre quarry site with respect to the mineral lease boundary. The map must show all corners and locations with respect to the government's Cadastral survey.

Sincerely,

John T. Blake
